## Deliverance from the Stolen Mind and Satan's Captivity

By Pastor Pat Holliday on February 9, 2010

<http://www.miracleinternetchurch.com/deliverance/deliverance-losing-the-stolen-mind-satans-captivity>

### Psychoactive drugs

An assortment of psychoactive drugs

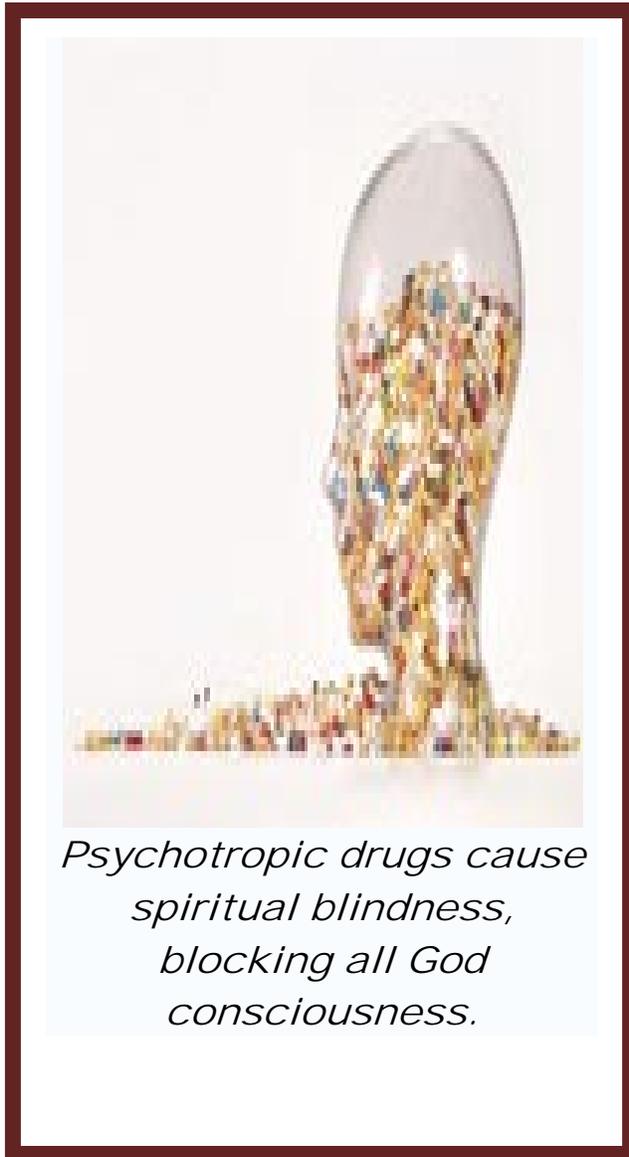

Psychotropic Drugs ~

☞ A **psychoactive drug**, **psychopharmaceutical** or **psychotropic** is a [chemical substance](#) that acts primarily upon the [central nervous system](#) where it alters [brain function](#), resulting in changes in [perception](#), [mood](#), [consciousness](#) and [behavior](#). These drugs may be used [recreationally](#) to purposefully alter one's [consciousness](#),

as [entheogens](#) for ritual or spiritual purposes, as a tool for studying or augmenting the mind, or therapeutically as [medication](#).<sup>1</sup>

## Renewal of the Mind

The devil's battlefield is your mind. You either control and protect your mind, or

the devil controls a part or all your mind. Do you know that the Scriptures say that you have the power to keep the devil out? (2 Cor. 5:17), **"Therefore if any man be in Christ, he is a new creature: old things are passed away; behold, all things are become new. "**

My concern as a deliverance minister is that when Christian people need deliverance from depression, oppression and powerful demonic powers, many pastors simply turn to the psychiatry seeking healing when the symptoms from depression, oppression can actually be demonic possession.

In Galatians 5:20, Revelation 9:21 and 18:23. The Greek Word *Harmakeia* is where we get "pharmacy" and its derivatives. In Galatians 5:20, it is translated "witchcraft" (KJV) and the occurrences in the book of Revelation are accurately translated "sorceries."

The Aramaic word *harsuta* – an extended form of the noun *harse*, is consistently translated as "sorcery," supporting the translation of *pharmakeia* into the same word.

<sup>1</sup> From Wikipedia, the free encyclopedia

*Sorcery is defined as “the use of supernatural power over others through the assistance of evil spirits.”<sup>2</sup> The use of psychotropic drugs (antidepressants) opens the doors for demons to infiltrate the human mind by unlocking chemical portals that takeover their thoughts... Sorcery demons come in and manipulate the patient’s emotions and cause spiritual blindness, blocking all God consciousness.*

*Because these psychotropic drugs are being prescribed by physicians, (antidepressants) are New Age solutions of sorcery that is widely accepted as solutions by secular society and Christian Churches.*

*Most people trust their doctors and cannot believe they would hurt them. Many doctors prescribe the harmful drugs believing they are helping to relieve their pain. However, the truth is, both patient and doctor are being misled by mega pharmaceutical companies that truly know exactly the great damage that they are doing to human minds. They know the great destructive mind controlling chemicals that they have manufactured.*

**What people do not know *can* certainly hurt them. Misinformation and ignorance has led many to unwittingly surrender themselves to the effects of these drugs, which in numerous cases has resulted in demonic rule over their emotions and thought patterns.**

In countless instances, Christians are prescribed mind controlling drugs. Regrettably, millions are like walking dead zombies finding themselves ensnared in a chemical prison that they cannot escape. We find very few ministries able to help with this massive problem. This minister has seen people from all walks of life, including some pastors that bought the lie that all they needed to do is take a little pill and it would all just go away. It is a lie and has become the greatest nightmare that you can ever imagine. There is no escapism from the power of sin. It must be dealt with in a spiritual manner in order to erase its power from your soul.

Early on, before these powerful drugs were created, people felt the powers of guilt and spiritual dealt with the problem through repentance and receiving Jesus. They were able to restore their souls through the inspiration and renewal of their souls by the Word of God. Now they dull their spirit, mind and body using drugs. It is not the answer but the beginning of a terrorizing life of demonic hellish torment.

---

<sup>2</sup> *The American Heritage Dictionary,*

(In the beginning), because psychoactive substances bring about subjective changes in consciousness and mood that the user may find pleasant (e.g. euphoria) or advantageous (e.g. increased alertness), many psychoactive substances are abused, that is, used excessively, despite risks or negative consequences. With sustained use of some substances, physical dependence may develop, making the cycle of abuse even more difficult to interrupt. Drug rehabilitation can involve a combination of psychotherapy, support groups and even other psychoactive substances to break the cycle of dependency.<sup>3</sup>

***SMOKING GOD CALMET  
INDIAN GOD MUST BE  
DELIVERED***

Psychotropic/psychiatric medications affect the brain and central nervous system. They alter the process of brain chemicals called neurotransmitters, which act as chemical messengers between the brain cells. Medication is prescribed when symptoms of mental or emotional illness are severe, persistent, and interferes with normal functioning. Psychotropic drugs help control symptoms such as anxiety, agitation, profound sadness, depression, disrupted patterns of appetite and sleep, confused thinking, poor concentration, altered perceptions and sensations, and discomfort from physical pain. Some psychotropic drugs are prescribed for

medical and neurological disorders. On occasion, two or more medications may be prescribed to relieve multiple symptoms. Which medication is prescribed depends on an individual's unique characteristics-severity of symptoms, health, age, pregnancy, etc. All drugs require careful monitoring and may necessitate initial and ongoing lab work and blood tests, special dietary restrictions, and lifestyle changes. Some of the newer medications target specific neurotransmitters and provide more effective treatment with manageable doses and fewer side effects such as sedation and addictive qualities.<sup>4</sup>

<sup>3</sup> ibid

<sup>4</sup> <http://www.counseling.txstate.edu/resources/shooverview/bro/psychmed.html>

Rev 9:21, --**“Neither repented they of their murders, nor of their sorceries, nor of their fornication, nor of their thefts.”** KJV When God’s judgments are in the earth, He expects the people to repent of sin and learn righteousness.

These terminologies describe SIN by God. So, therefore, deliverance ministers cannot free a person of all the demons except, what I call the pleasure demons, such as, sorceries (drugs), fornications (sexual sins) thefts, and murders.

### **“PASTOR PAT COULD NOT HELP ME”**

I recently had a young man return to our church that was so far gone; he had spent half a year in the mental institution. He made this statement in front of my church. “Pastor Pat could not help me.”

I replied, “Son, when you were here several years ago, I could not help you because you would not help yourself. Didn’t I tell you that you must quit smoking?” “Yes.” “Did you stop?” “No.” “Tell us,” what else were you doing? Were you taking drugs? Having sex, looking at pornography? drinking?” “Yes” “Did you pick up a witch and move her into your home telling her that I would not minister to you?” “Yes.” “So, whose fault is it that you could not find help here, mine or yours?” “Mine!”

This MAN WAS IN SERIOUS TROUBLE admitted that he was still smoking and ‘could not stop;’ taking five different psychotropic drugs, plus pain pills.

Deliverance ministers can drive demons out but they will just return seven times worse, if the person does not change their lifestyles to be healed of drug additions.

Matt 12:43-45, --**“When the unclean spirit is gone out of a man, he walketh through dry places, seeking rest, and findeth none. 44 Then he saith, I will return into my house from whence I came out; and when he is come, he findeth it empty, swept, and garnished. 45 Then goeth he, and taketh with himself seven other spirits more wicked than himself, and they enter in and dwell there: and the last state of that man is worse than the first. Even so shall it be also unto this wicked generation.”** KJV

This rise of “legal drugs” is a great problem to church counselors and deliverance ministers. You cannot tell people just stop taking this drugs. It is very dangerous to suddenly stop taking psychotropic drugs. The sudden shock could send them into a tail spin causing them to commit suicide.

Psychotropic drugs, known by most as “antidepressants,” are contributing to suicide rates around the globe.<sup>1</sup> The Associated Press reported on May 12, 2006 that GlaxoSmithKline and the US Food and Drug Administration sent a warning letter to doctors concerning the antidepressant Paxil.<sup>2</sup> The letter warned that Paxil may raise the risk of suicidal behavior in young adults, and it was accompanied by changes to the labeling of two different versions of the drug. The knowledge of the increase of suicide and other side effects linked to these drugs is clearly known to the pharmaceutical manufacturers and to the FDA, but it appears to matter little, since no real changes have taken place outside of the obscure (“black box”) warnings placed on the drug packaging. Could this have something to do with the billions of dollars that the sales of these drugs provide for the pharmaceutical companies as well as their lobbying interests in Washington DC? Even with their known detrimental effects, the FDA continues to allow them to be developed, marketed, and distributed to a grossly uninformed public.

You have probably heard of Prozac

Even...Halcion or Lithium. These are powerful medications, which benefit many people. With any prescription drug, of course, there may be misuse, adverse reactions, and potentially harmful results. Deciding whether medication might be beneficial to you should be a thoughtful process including your being an informed consumer and getting accurate information and an evaluation from a physician. Hopefully, this brochure will help you as a consumer. It highlighted the major psychotropic medications available today, general information about the drug, its use, and factors to consider when medication is recommended.<sup>5</sup>

### Psychotropic Medications

Psychotropic/psychiatric medications affect the brain and central nervous system. They alter the process of brain chemicals called neurotransmitters, which act as chemical messengers between the brain cells. Medication is prescribed when symptoms of mental or emotional illness are severe, persistent, and interfere with normal functioning. Psychotropic drugs help control symptoms such as anxiety, agitation, profound sadness, depression, disrupted patterns of appetite and sleep, confused thinking, poor concentration, altered perceptions and sensations, and discomfort from physical pain. Some psychotropic drugs are prescribed for medical and neurological disorders. On occasion, two or more medications may be prescribed to relieve multiple symptoms. Which medication is prescribed depends on an individual's unique characteristics-severity of symptoms, health, age, pregnancy, etc. All drugs require careful monitoring and may necessitate initial and ongoing lab work and blood tests, special dietary

restrictions, and lifestyle changes. Some of the newer medications target specific neurotransmitters and provide more effective treatment with manageable doses and fewer side effects such as sedation and addictive qualities.

### What is a Psychotropic Drug?

A psychotropic drug is nothing more than an antidepressant. The word “psychotropic” actually gives us a clue to how it works, just as the word “antidepressant” provides us with an idea of its intent or goal. The root word for “psychotropic” is the Greek word *psuche*, which means “soul.”<sup>6</sup> The soul includes the mind.<sup>6</sup> “*Trop*” is a prefix defined as “a turning or a changing.”<sup>7</sup> A derivative of this word is “*tropism*,” which means “the turning or bending movement of an organism or a part toward or away from an external stimulus, such as light, heat, or gravity.”<sup>8</sup> A literal meaning of psychotropic would be “a mind changer” or “a mind bender.” In other words, a psychotropic drug is a mind-altering, mind-bending drug. When the mind is bent or altered, an opening is created that accommodates an easy access for demons. *Pharmakeia* have been used since ancient times to do this, but in our present culture of secular humanism the diminishment of ethics has not only opened wide the doors to facilitate them, but it has also enabled the merchandisers to profit enormously from them.

Most antidepressants are believed to work by slowing the removal of certain chemicals from the brain. These chemicals are called neurotransmitters (such as serotonin and norepinephrine). Neurotransmitters are needed for normal brain function and are involved in the control of mood and in other responses and functions, such as eating, sleep, pain, and thinking.<sup>9,11</sup>

Serotonin and norepinephrine are naturally occurring hormonal chemicals placed in our bodies by our Creator for a purpose. Psychiatrists believe that when they are not released in the proper amounts, one of the consequences can be depression. For this reason, depression has been medically described as “a chemical imbalance in the brain,” although there are some researchers who would dispute this, saying that the chemical imbalance is *caused* by the depression. At any rate, it is this rationale that justifies the prescription of a chemical substance (many times a synthetic form of one or both of these hormones) as the cure, or more accurately, a balancing agent. Unfortunately, their solution of adding chemicals alters the normal processes of the patient’s thinking, creating the potential for other problems, such as suicide, which according to Luke 8:32 and 33 is caused by demons.

Antidepressants help people with depression by making these natural chemicals more available to the brain. By restoring the brain’s chemical balance, antidepressants help relieve the symptoms of depression.<sup>10</sup>

Most of these antidepressants are classified as selective serotonin re-uptake inhibitors (SSRIs). They endeavor to inhibit the absorption of serotonin, demanding more of it to be produced by the brain. Consequently, the brain function is altered, and in some ways even slowed down,

---

<sup>6</sup> 7. Lester Sumerall, *Spirit, Soul, & Body* (New Kensington, PA: Whitaker House, 1995), 81.

<sup>7</sup> *American Heritage*.

<sup>8</sup> *ibid*

<sup>9</sup> A quote from HealthyPlace.com, a website that favors the use of antidepressants,

<sup>10</sup> The article from HealthyPlace.com

affording demons the opportunity they need to “hop on”—like hoboes climbing onto a train. Some researchers believe depression is already related to several sections of the brain moving slowly.<sup>14</sup> The brain activity that is initially stimulated by these drugs often evolves over time into adrenal exhaustion.<sup>11</sup> This accentuates the pre-existing problem of depression, causing the person to sink down even further into lethargy. This listless attitude welcomes a wide variety of negative thoughts—worry, fear, despair, and hopelessness—often ending in suicide. This is the slippery slope of depression, and antidepressants can grease the slide.

Psychotropic drugs introduce unnatural chemicals into a natural system designed by God. They are synthetic chemicals engineered by pharmaceutical companies who are playing God. Their researchers have plugged chemical possibilities into their computers in order to develop molecular shapes and substances that appear to fix one thing, but with devastating consequences. It’s like throwing a hand grenade into your kitchen to kill a mouse under the cabinet. This is why all the side effects and possible dangers need to be posted (and their list is usually longer than the list of benefits). Some common names of psychotropic drugs with their brand names in parentheses are:

- escitalopram (Lexapro)
- citalopram (Celexa)
- fluoxetine (Prozac)
- paroxetine (Paxil)
- sertraline (Zoloft)

The names of these chemicals do not sound very “natural,” do they? This particular group of SSRIs works to retard serotonin absorption in the body. Other varieties work to suppress both serotonin and norepinephrine.

Ritalin (methylphenidate) is a common culprit in teen suicide too.<sup>12</sup> It operates differently than an SSRI by targeting another neurotransmitter, dopamine. It is a blatant stimulant, rated higher than caffeine and lower than amphetamines. It binds itself to the dopamine in much the same way as the SSRIs bind themselves to serotonin, and it slows down the absorption rate into the body. Ritalin is a stimulant which offers a pleasurable effect to the recipient—usually a youth diagnosed with ADHD.<sup>13</sup>

Updated on March 11, 2003, <http://www.antidepressantfacts.com/pinealstory/html> (accessed July 20, 2006). “If a patient continues to ingest a particular SSRI-antidepressant over a prolonged period of time, eventually the body’s adrenal glands may lose their efficiency and ‘Adrenal Exhaustion Syndrome’ will be the end result.”

## Antidepressants

Depression is a syndrome with varied causes. Multiple symptoms may include disrupted patterns of sleep and eating (too much/too little,) poor concentration, impaired memory, increased agitation or lethargy, pervasive sadness and hopelessness, etc. Discovered in the 1960's, antidepressants generally increase the level and availability of the neurotransmitters-serotonin and norepinephrine. Medication may take 4-6 weeks for full effect. An additional (interim) drug may be prescribed for 6 months to a year or longer (unusually 6 months after symptoms subside). These drugs are also used for pain management.

Brand Name	Generic Name	Comments
<b>TRICYCLICS</b>		
Elavil	amitriptyline	TCA's discovered in the 1960's. Anticholinergic side effects: dry mouth, constipation, blurred vision, urinary retention, dizziness, etc.
Tofranil	imipramine	
Norpramin	desipramine	
Pamelor	nortriptyline	
Sinequan	doxepin	
Anafranil	clomipramine	OCD (Obsessive Compulsive Disorder)
Vivactil	protriptyline	
Surmontil	trimipramine	
<b>MAOIs (monoamine oxidase inhibitors)</b>		
Nardil	phenelzine	Inhibits action of the MAO enzyme; restricted tyramine diet and use of other medications; atypical depression; panic and phobic disorders
Parnate	tranylcypromine	
Marplan	isocarboxazid	
<b>SSRIs (selective serotonin reuptake inhibitors)</b>		
Prozac	fluoxetine	wide applicability; panic disorder and OCD; quick acting; fewer side effects; simpler dosage
Paxil	paroxetine	
Zoloft	sertraline	
<b>OTHER</b>		
Wellbutrin	bupropion	dopamine reuptake inhibitor; rapid cyler bipolar; seizure risk
Desyrel	trazodone	depression with anxiety
Asendin	amoxapine	quick acting; potential tardive dyskinesia; seizures
Ludiomil	maprotiline	
Effexor	venlafaxine	blocks reuptake of serotonin and norepinephrine

## Mood Stabilizers

Bipolar (manic-depressive) mood swings alternate between extreme depression and mania (elation, grandiosity, hyperactivity, etc.). Drugs alter the metabolism, liver, kidney, and thyroid functioning, and possibly an electrocardiogram, may be required. Regular bloods tests (weekly/monthly) help establish the therapeutic dose. Short-term use of a

major tranquilizer or antidepressant along with a mood stabilizer normalizes the mood range.

Brand Name	Generic Name	Comments
Lithium Carbonate Eskalith	lithium	Discovered effective for mania in 1949; increased thirst and urination; fine hand tremor
LITHIUM SUBSTITUTES (anticonvulsants)*		
Tegretol	carbamazepine	Used for forms of epilepsy in the 1960's; helpful for BP (bipolar) who are nonresponsive to lithium; atypical depression (increased sleep and weight gain)
Depakene/Depakote	valproic acid	Increases levels of GABA neurotransmitter and inhibits abnormal nerve impulses which cause seizures; used with wide and rapid mood changes (rapid cyclers)
Klonopin	clonazepam	Adjunctive drug for BP (bipolar); anti-anxiety drug with potential physical dependence
*Use of anticonvulsants developed from the theory of mania known as kindling (persistent excitability in the brain causes an affective seizure or manic attack)		

### Psychostimulants

This medication increases the release of norepinephrine and causes wakefulness, alertness, and increased attention span. Prescribed for hyperactive children, and those with attention deficit disorder, it relieves distractibility, impulsiveness, and restlessness. Also, it is prescribed for narcolepsy, some depressive conditions, and for those with serious medical illness. Careful monitoring, with routine medical tests, is recommended.

Brand Name	Generic Name	Comments
Ritalin	methylphenidate	
Cylert	pemoline	periodic liver function tests
Dexedrine	dextroamphetamine	

### Anti-Anxiety Drugs (Anxiolytics)

Primarily used for temporary relief of anxiety, these drugs are prescribed for panic disorder, phobias, OCD (obsessive compulsive disorder), alcohol/drug withdrawal, and symptoms related to medical problems. These drugs alter the activity of the GABA neurotransmitter and slow the limbic system. Possible drug dependence requires careful monitoring of dose, length of treatment, and tapering off the medication. Frequently, antidepressants, and more than one drug, may help relieve anxiety.

Brand Name	Generic Name	Comments
<b>BENZODIAZEPINES</b>		
Xanax	alprazolam	short-acting; anxiety with depression, panic and phobias; potential anterograde memory (forget things that occur a few hours before taking the drug)
Librium	chlordiazepoxide	used with alcohol/drug withdrawal
Klonopin	clonazepam	used for seizure disorder; adjunctive with BP (bipolar) and psychoses
Tranxene	chlorazepate	
Valium	diazepam	
Paxipam	halazepam	
Ativan	lorazepam	short-acting
Serax	oxazepam	short-acting
Centrax	prazepam	
<b>OTHER</b>		
BuSpar	buspirone	affects dopamine, norepinephrine and serotonin; effective long-term with generalized anxiety; non-sedating with few side effects
Benadryl	diphenhydramine	antihistamines; mild sedation with anti-anxiety qualities
Vistaril	hydroxyzine	
Equanil	meprobamate	high risk for dependency
<b>BETA-BLOCKING AGENTS</b>		
Inderal	propranolol	short-term relief of social phobia, performance anxiety; blocks action of sympathetic nervous system; lowers oxygen demand and blood pressure; relief from migraine headaches
Tenormin	atenolol	social phobia/performance anxiety; relieves high blood pressure and angina

### Anti-Psychotics (Major Tranquilizers) (Neuroleptics)

First developed in the 1940's to calm pre-surgery patients, these drugs sedate and relieve symptoms of confused, disordered thoughts and severe bipolar mood swings. The medication reduces/blocks the dopamine neurotransmitter. Though non-addictive, these drugs are potentially harmful. Careful monitoring is required to prevent irreversible side effect. An additional medication may be prescribed to counteract side effects from the primary drug.

Brand Name	Generic Name	Comments
<b>TYPICAL</b>		
Thorazine	chlorpromazine	

Mellaril	thioridazine	low potency
Serentil	mesoridazine	
Prolixin	fluphenazine	
Trilafon	perphenazine	high potency - high risk for EPS (extrapyramidal symptoms) parkinsonian-like symptoms: muscle weakness, slow rigid movement, muscle spasms, restlessness, involuntary movement of the face, mouth, eyes, neck, etc.
Stelazine	trifluoperazine	
Navane	thiothixene	
Haldol	haloperidol	
Loxitane	loxapine	
Moban	molindone	
ATYPICAL (dopamine and serotonin inhibitors)		
Clorazil	clozapine	FDA approved in 1990; this has fewer side effects; targets lethargy, mood and withdrawn behavior; requires weekly blood tests to avoid risk of agranulocytosis (white blood cell abnormality)
Risperdal	risperidone	
Orap	pimozide	requires weekly monitoring; Tourette's syndrome
DRUGS TO COUNTERACT SIDE EFFECTS (ANTIDYSKINETICS)		
Cogentin	benztropine	
Artane	trihexyphenidyl	
Benadryl	diphenhydramine	
Symmetrel	amantadine	

## Hypnotics

A complex brain function, sleep is influenced by many factors and unique to each individual. Medication is prescribed for a limited time period, at a low dose, because it fosters dependency, and has side effects with rebound insomnia. It is used as an adjunctive drug with antidepressants (which take 4-6 weeks to take effect). Rarely life threatening, sleep deprivation can impair thinking, perceptions, and physical activity. Sleep disorder clinics provide definitive diagnosis of a prolonged sleep problem.

Brand Name	Generic Name	Comments
BENZODIAZEPINES (acts on the thalamus, hypothalamus, and limbic system)		
Pro-Som	estazolam	short-acting
Dalmane	flurazepam	
Doral	quazepam	
Restoril	temazepam	
Halcion	triazolam	shortest acting, potential anterograde amnesia (impairs recall of new information)
BARBITURATES		
Amytal	amobarbital	very sedating/addictive
Nembutal	pentobarbital	
Seconal	secobarbital	
ANTIHISTAMINES		

Benadryl	diphenhydramine	over-the-counter medication with sedative qualities
Unisom	doxylamine	
Atarax	hydroxyzine	
OTHER		
Noctec	chloral hydrate	one of the oldest (1860) - "Mickey Finn" short term effect (two weeks)
Placidyl	ethchlorvynol	high abuse potential
Noludar	methypylon	
Ambien	zolpidem	

5-4.1 LBJ Student Center | 601 University Drive, San Marcos, Texas 78666 | 512.245.2208 | Hours: 8:00 a.m. - 5:00

I cannot recommend that anyone presently taking psychotropic drugs to judge them. However, if one is seeking deliverance, I am saying that they cannot get freedom from demons if they are taking these medications and must get off. Deliverance from the demons and submission to Jesus and His Word will give you relief. You cannot suddenly stop taking these drugs. If you are accustomed to them, stopping too quickly could cause a negative reaction and even suicide. You will need professional help and work with your doctor.

Deliverance is a process. It will entail a combination of prayer by a qualified deliverance minister; a concentrated feeding the mind on the word of God to heal and restore the mind. Your weaning process should be supervised by your medical provider.

Sin is the reason for the lack of peace in the mind of men and women. We cannot counsel the demons out of their minds. We cannot change their lives with psychology. We must return to the basics of the Word of God and Jesus Christ as Lord. We must depart from this global explosion of false religious peace of a strange, new, universally accepted Jesus that is being introduced into the Christian Church, a "Jesus" who resides in Buddhist and Shinto Temples and shrines. This is a "Jesus" who approves homosexuality and never condemns.

Texe Marrs says it is the global explosion of religious blasphemy that has women dancing and mentally having sex with a dreamy "Jesus." Through the spiritual powers of this blasphemy; people are holy laughing hysterically in churches, barking like dogs, roaring like lions and screaming like hyenas.

The stage is being set to bring the Antichrist to power. Will this new Jesus deceive the whole world? Is the Great Apostasy as prophesied in (2 Thess. 2), the end-time stage in which the full powers and miraculous works of Satan's Antichrist come to fullness?

It is very evident that the natural "psyche" men and women do not understand the things of God; also will not understand the things of Satan. If the spiritual person is a believer and understands the things of God that person should also understand the things of the spirit of the devil. While many have received instruction concerning the Holy Spirit, only a few have been taught about the wiles of the unholy spirit, The Bible is a supernatural book inspired by God and shows the reality of the transference of spirits.

The apostle Paul shows us in (1Cor. 2:11), **"For what man knoweth the things of a man, save the spirit of man which is in him? even so the things of God knoweth no man, but the Spirit"**

**of God. Now we have received, not the spirit of the world, but the spirit which is of God; that we might know the things that are freely given to us of God. Which things also we speak, not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth; comparing spiritual things with spiritual. But the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him: neither can he know them, because they are spiritually discerned."**

## **NECESSITY FOR DELIVERANCE**

Some of the most common symptom of demons dwelling in a person: Emotional Problems -- Disturbances in the emotions which persist or reoccur. Some common ones are ~ resentment, hatred, anger, fear, rejection, self-pity, jealousy, depression, worry, inferiority, insecurity.

Mental problems – Disturbances in the mind or thought life.

Some common ones ~ mental torment, procrastination, (put off), indecision, compromise, confusion, doubt, rationalization, and loss of memory. Mental life (soul), seeks to dominate the spirit.

- Speech problems~ Outbursts or uncontrolled use o the tongue, lying, cursing, blasphemy, criticism, mockery, railing, gossip.
- Sex Problems ~ unclean thoughts that recur regarding sex; fantasy sex, fantasy sex experiences; masturbation, lust, perversions, homosexuality, fornication, adultery, incest, and harlotry, provocative.
- Addictions~ Nicotine, alcohol, drugs, medicines, caffeine, food, diet pills, diet regimes you cannot come off; Pepsi, Coke.
- Physical infirmities ~ Many diseases, and physical afflictions are due to spirits of infirmity (Lk. 13:11). When a demon of infirmity is cast, there is often the need to pray for a healing of whatever damage has been done. Always recognize, refuse and ignore imagination.
- Religious Error ~ Involvement to any degree in religious error can open the door.
- False religion ~ eastern, pagan religions, and philosophies and mind sciences
- Yoga, Karate, Jujitsu, and all the martial arts.
- Christian Cult~ Mormonism, Jehovah' Witness, Witness Lee Christian Science, Unity, Rosicrucian's, Theosophy. . . and many more.

- All those deny the necessity of the Blood of Jesus as the way of atonement for sin and salvation. Some cults include certain lodges, societies and social agencies, such as, Masonry, and all cults that use the Bible but deny the deity of Jesus Christ and His blood atonement.
- Occult & Spiritualism~ Séances. Witchcraft, magic, Ouija boards, levitation, palmistry, handwriting analysis, divination, automatic handwriting, EST, horoscope, astrology, and any method of seeking supernatural power or wisdom or guidance or knowledge apart from God is forbidden, (Deut. 18:9-15).
- False Doctrine I Timothy warns of a great increase of doctrinal error promoted by deceiving spirits and seducing spirits in the last days. They are sent to attack both the humanity and deity of Jesus. They will deny the inspiration of the Scripture. They will distract Christians from the move of the Spirit. They will cause disunity in the body of Jesus Christ. They will cause confusion in the Church through strange doctrines. They will foster emphasis on fleshly activities as a gateway to the supernatural.

Derek Prince Expelling Demons, "The New Testament Greek word for demon is *daimonion*...in the KJV...often translated 'devil.' Associated in the NT with noun *daimonion* is the passive verb *daimonizomai*. The literal meaning of this verb is 'to be *demoned*,' that is, in some way under the influence or power of demons. In the KJV this verb is usually translated by some phrase such as 'to be possessed' or 'to be vexed' by demons or by evil spirits. However, there is no distinction in the original Greek text to support these (translated) distinctions. We dare not rest a theological distinction about the work of demons on a distinction in language which does not exist in the original.

#### The Carnal Mind

(Rom. 1:28), **" And even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind, to do to those things which are not convenient;"**

(Rom. 7:23), **"But I see another law in my members, warring against the law of my mind, and bringing me into captivity to the of sin which is in my members."**

(Rom. 7:25), **"I thank God through Jesus Christ our Lord. So then with the mind I myself serve the law of God; but with the flesh the law of sin."**

(Rom. 8:5), **"For they that are after the flesh do mind the things of the flesh; but they that are after the Spirit the things of the Spirit."**

(Rom. 8:7), **"Because the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be."**

(Col. 2:18), **"Let no man beguile you of your reward in a voluntary humility and worshipping of angels, intruding into those things which he hath not seen, vainly puffed up by his fleshly mind."**

Evil Thoughts:

(Jam. 2:4), **"Are ye not then partial in yourselves, and are become judges of evil thoughts? "**

(Matt. 15:19), **"For out of the heart proceed evil thoughts, murders, adulteries, fornications, thefts, false witness, blasphemies. "**

(Mk. 7:21), **"For from within, out of the heart of men, proceed evil thoughts, adulteries, fornications, murders "**

Evil Imagination

(1 Chron. 28:9) **"And thou, Solomon my son, know thou the God of thy father, and serve him with a perfect heart and with a willing mind: for the LORD searcheth all hearts, and understandeth all the imaginations of the thoughts: if thou seek him, he will be found of thee; but if thou forsake him, he will cast thee off for ever."**

(Prov. 6:18), **"An heart that deviseth wicked imaginations, feet that be swift in running to mischief."**

(Lam. 3:60) **"Thou hast seen all their vengeance and all their imaginations against me."**

(Lam. 3:61), **"Thou hast heard their reproach, O LORD, and all their imaginations against me."**

(Rom. 1:21) **"Because that, when they knew God, they glorified him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened."**

(2 Cor. 10:5), **"Casting down imaginations, and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ; "**

Spiritually Minded

(Rom. 8:6), **"For to be carnally minded is death; but to be spiritually minded is life and peace."**

(Rom. 8:5), **"For they that are after the flesh do mind the things of the flesh; but they that are after the Spirit the things of the Spirit."**

(1 Cor. 2:16) **"For who hath known the mind of the Lord, that he may instruct him? But we have the mind of Christ."**

(Phil. 2:5) **"Let this mind be in you, which was also in Christ Jesus: "**

(Col. 2:18), **"Let no man beguile you of your reward in a voluntary humility and worshipping of angels, intruding into those things which he hath not seen, vainly puffed up by his fleshly mind."**

(Col. 3:12), **"Put on therefore, as the elect of God, holy and beloved, bowels of mercies, kindness, humbleness of mind, meekness, longsuffering."**

Wise Thoughts

(Phil. 4:8), **"Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."**

You can: Protect your mind

(Eph. 6:17), Protect your children's' minds (1 Cor. 7:14; Jn. 17:12, Isa. 54:13:13; Eph. 6:11).

Protect the minds of the newly delivered (Eph. 6:18:18; Rom.8:26-27).

You have to work attaining authority and below are the steps you need to take: You must become a believer, for this only works for believers, (Jn. 14:12; Mk.16:17).

Break the bondage of Satan over the aware and unaware mind.

Command all bonds of serpents, chains, cords, metal, etc, to be cast off, cut off and removed, in the authority of the Lord Jesus Christ.

Call for the Father to send angels with swords to do this (Hebr. 1:14; Lev. 26:13; Isa. 28:22; Job 38:31).

Daily recite renunciation and warfare prayers and break soul ties.

Daily break away from all mind-altering medicines such as Valium, Librium, Serex, Phenobarbital, sleeping pills, etc.

Have an attitude of deliverance and keep yourself in a state of continuous deliverance.

Why?

Because any doubt, negative thought, care, or worry will be a crack in your protective armor.

Cast our fears (name each one or family group) such as: Forgetfulness, Curses, Vows, Anxiety, Confusion, Envy, Jealousy, Gossip, Compromise, Craving, Addictions, Mind Control Spirits, etc. (Mk. 16:17; Phil. 4:4-8).

Salvation really means being saved or delivered out of the control of the devil.

(Rom. 10:10), says that we actually set ourselves free of various areas of Satan's bondage as we confess (say so) with our mouths and agree with God's Word.

We are freed as we agree with God and believe that through Jesus Christ we are being delivered as we speak it forth.

Jesus Christ will set us free of sickness, bondage, poverty, oppression, and anything else that the devil tries to lay on us if we agree with the Word of God and act upon it, (Phil. 2:12; Eph. 6:17).

Learn the true meaning of hope.

Hope within the believer is an inner uplift of optimism which comes from knowing that are seated in heaven with the Father through Christ. Because of Christ's conquering power in us we can defeat and eliminate every care and worry. It is with this confidence that we are complete in Him. **“But let us, who are of the day, be sober, putting on the breastplate of faith and love: and for an helmet, the hope of salvation,”** (1 Thess. 5:8).

**“For once you were in darkness, but now you are light in the Lord; walk as children of light,”** (Eph. 2:6).

**“For in him dwelleth all the fullness of the Godhead bodily. And ye are complete in him, which is the head of all principality and power,”** (Col. 2:9- 10).

Now you can control your mind by bring every thought into captivity.

You can now accept good thoughts and reject the devil's thoughts (2 Cor. 10:5).

Our Lord Jesus said of the soul processes of man (speaking to the born - again believer): **"He that findeth his soul (life) shall lose it: and he that loseth his soul (life) for my sake shall find it."** (Matt. 10:39). And again He said: **"If any man would come after me, let him deny himself (his soul life or heart attitude) and take up his cross and follow me. For whosoever will save his soul shall lose it; and whosoever shall lose his soul for my sake, and the gospel's, shall save it,"** (Mk. 8:34 & 35).
